

# Curriculum Vitae – Shaun Klingbiel

I am passionate about the education of children and young people. Learning empowers our children to set goals to achieve in life. My teaching and learning program is designed to fuel student's passions and teach them the skills, knowledge and understanding that will lead them to positively contribute to their own lives as well as the world they live in. Pedagogy that informs 'how I teach' include the TfEL, John Hattie's Visible Learning Program and SA Leaders and Teachers Resource. These programs have guided my development, methodology and assessment as I identify the impact of my teaching on student learning outcomes.
